

the power of

elōs

Safety, Comfort, Results.

Choosing a solution for hair removal and skin rejuvenation was once a confusing and difficult decision. Many methods and technologies promise the best results, but most fall short.

elōs™ technology has changed everything.

Simply put, elōs is proven to be the safest, most effective and comfortable solution for the superior results you demand.

How does elōs work?

elōs (electro-optical synergy) uses a unique combination of radio frequency and light. Using two energies instead of one means more effective results for you with lower overall energy output. Lower energy output means the highest level of safety and comfort for you. Gentle pulses of targeted energy isolate the treatment area and leave the surrounding skin free from potentially harmful side effects.

Does elōs work for everyone?

For Hair Removal –

Yes, elōs is the superior solution for removing hair of all colors on all skin types – even tanned skin.

For Skin Renewal –

elōs is an effective treatment for most skin types.

Talk with your doctor to discuss how elōs technology can help you achieve superior results for hair removal and/or skin rejuvenation.
